3	33021	opaque blue, yellow-brown luster	1		65001507 Czech Seedbeads - 10/0 Seedbead - Metallic Gunmetal (hank) https://www.beadfx.com/catalogue/index.php?main_page=product_info&products_id=12584 Despite the name, looking this up on Preciosa's site shows it to be a grey. This is the closest we have, although you can see from this image that a slightly more lustred grey is called for, but our suppliers don't carry it.

8	10110 dark topaz	16		I think our Topaz is a little light, and we don't have a dark topaz. I would tend to go for the Silver Lined Brown, personally.
			65001313 Czech Seedbeads - 10/0 Seedbead - Silver lined Brown (hank)	https://www.beadfx.com/catalogue/index.php?main_page=product_info&products_id=4749

9	93210 opaque red coral	14		Again, not a name we have. This looks like it is in the ballpark, though.

14	88110	1	no picture	this does not show up in the Preciosa database at all, so it might be a typo. But looking at the chart, it looks like it is a highlight of the orange on the beak, so a lighter orange would work
